Your partner
in Advanced Solutions

SERVICES

Engineering & Programming

Synergy delivers advanced engineering and programming services, integrating factory automation, robotics, PLCs, SAP consulting, OT and IT, IIoT, and analytics to support digital transformation and optimize industrial operations.

Electromechanical Design & Installation

We specialize in the design, fabrication, and installation of electromechanical systems, equipment, and structures, providing reliable and high-performance solutions for industrial and automotive environments.

Energy Solutions

Synergy provides solar energy and photovoltaic solutions for industrial and commercial applications. Supported by experienced and certified professionals, our solutions focus on efficiency, cost optimization, and long-term sustainability.

Engineering & Programming

See our key **ENGINEERING & PROGRAMMING** service offerings:

Digital Transformation from both sides

We leverage our industry expertise to digitally transform manufacturing through automation, robotics, and advanced digital solutions. By integrating technology into every facet of your business operations IT/OT Solutions, we prepare your company for the demands of the digital age. We understand to stay current, and we provide cutting-edge solutions that enable sustained, profitable growth.

OT Automation Enhancement

We optimize industrial processes with a strong focus on **SAFETY** and **EFFICIENCY**. Our custom automation solutions are designed to enhance production workflows, improve operational efficiency, and reduce downtime.

Robotics Integration for Factory Automation

We optimize manufacturing processes through advanced machine integration, covering a variety of applications such as welding, painting, material handling, and more. Our solutions enhance productivity, reduce human error, improve safety, and ensure consistent quality while minimizing waste. Looking to the future, we see Robotics and AI converging through OT/IT systems, creating smarter, more efficient solutions for advanced automation.

Project Management for every Step in Factory Automation

Our dedicated project management team ensures that every phase of your manufacturing process stays on schedule and within budget, delivering personalized expertise tailored to meet your unique needs and drive optimal performance.

CUSTOMERS & PLANTS

PARTNERSHIPS

Electromechanical Design & Installation

See our key **ELECTROMECHANICAL DESIGN & INSTALLATION** service offerings:

Boilmaking, Cutting & Welding Works

Synergy provides comprehensive boilmaking services, including cutting, welding, and metal fabrication, as well as the design, calculation, manufacture, and installation of metallic structures. Our capabilities also cover the manufacture and installation of low- and high-pressure piping systems, including risers, ensuring structural integrity, safety, and compliance with industrial standards.

Industrial Machinery & Equipment Installation

We specialize in the installation and integration of industrial machinery and equipment, supporting complex manufacturing environments. Our experience includes cooling systems, industrial ovens, pedestal and rail robots, and complete systems aimed at the optimization and improvement of production lines, such as positioners, encoders, motors, roller and chain systems, and conveyor belts, ensuring reliable and efficient operation.

Material & Utility Supply Systems

Synergy designs and installs material and utility supply systems for industrial equipment, enabling continuous and controlled operation across production processes. These systems include water, air, steam, painting systems, solvents, gas, and other essential services, tailored to meet the specific technical and operational requirements of each facility.

Energy Solutions

See our key ENERGY SOLUTIONS offerings:

Services

- Installation of solar panel systems
- Preventive and corrective maintenance
- Hybrid and backup energy systems
- Energy consulting and customized energy solutions
- Financing options and banking partnerships
- AI-powered energy proposal automation, including intelligent analysis of utility bills and rapid selection of customized solar kits

CUSTOMERS

All men naturally desire to know. This is indicated by the love of the senses; for, apart from their usefulness, they are loved for their own sake, and he who more than everyone, the sight.

Aristoteles

Leading teams for a higher goal
