

Digital Transformation a New Era

Start your Digital Transformation journey:

Synergy is ready to partner with you on this transformative path, helping your business unlock new growth opportunities through technology. |

Your Partner in **Digital Transformation.**

Thriving in the digital era requires businesses to adapt rapidly to stay competitive.

Synergy is your trusted partner in navigating this landscape.

Our mission: Empower your business to reach heights by leveraging tailored Digital Transformation solutions.

We are...

A strategic alliance company serving the industrial sector, specializing in OT and IT across Factory Automation, Robotics, IIoT, and SAP Consulting.

We develop innovative solutions through certified and trained professionals, offering expertise in a wide range of specialties for factories and general industry.

In a world where talent is scarce and technology evolves rapidly, we simplify the complex and guide you through the noise to achieve lasting success

Accelerate your Digital Transformation with SAP

Business digitalization moves fast, and staying ahead requires expert guidance. The tools are here, and a reliable technology partner with SAP solutions can help.

A specialized consultant provides training, problem-solving, auditing, and ensures full access to the best tech tools.

From the basics of 'where do I start?' to exploring the full capabilities of SAP, consulting is available for everyone.

We need to hear from you, understand your process, and work together to craft solutions. So let's begin your project from consulting, training, or advisory to auditing your operations. Gaining insights is key to proving that the path taken is the right one.

We're here to ensure
every step counts.

Succes Stories: How We've Empowered Similar Business

Automotive Industry

Participate in a project in where the application of data analytics helps the client to visualize energy consumption in the different production lines and optimize the use of robots, reducing costs.

Integrated IIoT

with layouts and layers of the plant enabling real/time monitoring of devices to solve issues and apply predictive maintenance to minimize stoppages.

Manufacturing Sector

Our consultants have participated in different

SAP Projects: A Go-Live project of the implementation of SAP Manufacturing Integration and Intelligence and SAP Manufacturing Execution in a Multinational company.

Implementation of SAP Business One, resulting in supply chain efficiency and waste reduction. |

SAP S/4HANA

Why Choose **Synergy Digital Core**

Proven expertise: With an extensive track record in manufacturing processes and emerging technologies, Synergy stands as a leader in delivering impactful Digital Transformation strategies.

Tangible results: we have consistently helped clients achieve operational efficiency, reduce costs, and significantly increase profitability by implementing innovative and cutting-edge digital solutions.

Customer-centric approach: Our solutions are crafted to meet the specific needs of your organization, ensuring a quick and sustainable return on investment.

Industry knowledge: Our expertise in manufacturing and automotive allows us to anticipate and solve your unique challenges. |

Synergy utilizes its expertise in manufacturing and emerging technologies to deliver Digital Transformation strategies that improve efficiency, reduce costs, and enhance profitability, with customer-centric solutions tailored to your organization's needs.

Driving your Digital Transformation

SAP Consulting

We provide comprehensive services for SAP solutions, including SAP ERP, SAP S/4HANA, and SAP Business One.

We offer staffing for rollouts, remote support, and project management, helping businesses transition from legacy systems to cloud-based SAP solutions for enhanced scalability and agility. |

IIoT

Industrial Internet of Things

Connecting machines, devices, and systems to enable real-time data collection and analysis for smarter decision-making.

Automating manufacturing processes, improving efficiency and productivity across the board.

We push boundaries with each solution, turning challenges into opportunities and advancing with every project.

Our Approach: Digital Transformation in 4 Key Phases

ASSESSMENT & STRATEGY

We begin with a comprehensive assessment of your current infrastructure and digital capabilities, working closely with your team to understand your business goals. Based on this.

PLANNING AND DESIGN

We develop a tailored digital transformation roadmap that aligns with your objectives and addresses key pain points. We prepare a Business Blueprint with all the processes and system requirements to guide the configuration and customization.

IMPLEMENTATION

Our team handles the end-to-end implementation of SAP, IIoT, and Data Analytics solutions, ensuring smooth integration with minimal disruption to your operations. We follow an agile methodology, enabling continuous feedback, quick adjustments, and faster deployment.

OPTIMIZATION & ONGOING SUPPORT

Once deployed, we provide ongoing monitoring, optimization, and support services to ensure the solutions continue to deliver the desired outcomes. We also offer training and resources to empower your team to take full advantage of the implemented systems.
